

LION BATTERIES

LION GOLF KART BATTERIES

Lion Deep Cycle batteries are designed and manufactured to meet the strenuous demands of today's Deep Cycle applications. They are designed to withstand repeated discharging and recharging and offer sustained power over extended periods. The comprehensive range of Lion Deep Cycle batteries are available for electric golf carts, battery assisted golf buggies and numerous recreational and commercial market applications.

LION DEEP CYCLE BATTERIES

- Will last up to 700 cycles at 75% depth of discharge at the 5 hour rate. With technologically advanced construction capable of withstanding repeated substantial discharges of up to 80%.
- Designed specifically for heavy duty 6, 8 and 12 volt recreational and commercial applications including golf carts.
- Vent plug accessibility allows for ongoing maintenance of electrolyte levels to achieve extended battery life.
- Manufactured with thicker plates and a denser lead/anti-aging material paste formula to add robustness for repeated cycling and extended service life.

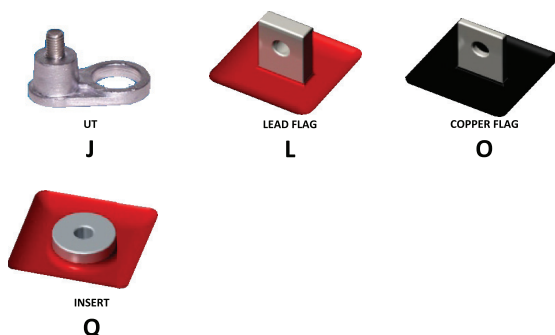

SINGLE POINT BATTERY WATERING SYSTEM

- Automatic cut-off valve allows water to flow into each cell until it reaches the correct levels and prevents over-filling.
- Single connection point that allows each cell to be filled accurately and efficiently.
